Hi,

Status update is still as per summary sent on Thursday, 28.12.2023 (see email below, from 2023/12/28). I will provide a separate update regarding OpenAPI / Swagger stuff, which I worked on intermittently in the meantime, once I wrap up.

Regarding recent GitHub notifications I received, pertaining commits you made:

- a week ago, on 2024/01/03, in reply to your comment (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36#issuecomment-1874249302>) to detailed summary I provided on 28.12.2024 (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36#issuecomment-1870682157>), I asked for detailed enough examples as it was still not clear to me what exactly is needed;
- then, yesterday, you committed <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/40/commits/cae0f5808fe7d497ea747bbc126271fe1cd2079c>, which simply removed those obsolete annotations (i.e. `@RequireEMFCSVResourceFactory`, `@RequireEMFODSResourceFactory`, `@RequireEMFRLangResourceFactory`, `@RequireEMFXLSXResourceFactory`), which was exactly what was causing this misunderstanding - you did not reply to my request for examples, and simply removed those, then merged this, so my understanding is that was clarified this way;
- in that same commit (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/40/commits/cae0f5808fe7d497ea747bbc126271fe1cd2079c>), I see that you added annotations to integration tests, which was not practiced so far in any of the projects yet (i.e. `@RequireEMFCSV` to `EMFCSVResourceTest`, `@RequireEMFODS` to `EMFODSResourceTest`, `@RequireEMFRLang` to `EMFRLangResourceTest`, and `@RequireEMFXLSX` to `EMFXLSXResourceTest`) - I simply specified those as run requirements in respective BND run file; my understanding is that should also serve as answer to question I asked earlier / problem I encountered and described;

So, considering <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36> is now merged ("Gecko EMF Exporters (CSV, XLSX, ODS) enhancements"), open items from that summary from 2023/12/28 are:

- MDO – Integration of latest 'Gecko EMF Utilities' version
- Traffic cameras project
- AVATAR project - here, **Mark's input is needed**;

Regards,

Hi,

Status update is as per summary sent on Thursday, 28.12.

Toggle entries for the month of December are now annotated and flattened.

I saw your reply Juergen (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36#issuecomment-1874249302>) to my detailed summary (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36#issuecomment-1870682157>) and I would like to ask that you provide detailed enough examples to make sure I understand what you require; I outlined my understanding in <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/36#issuecomment-1870682157> but your reply does not contain sufficient information to clarify what exactly is needed in addition to what is already done - I need specific examples.

Regards,

Hi,

Attached please find PDF with status update as of 28.12.2023. It contains updates regarding the following projects:

- MDO – Integration of latest 'Gecko EMF Utilities' version
- Gecko EMF Exporters (CSV, XLSX, ODS) enhancements
- Traffic cameras project
- AVATAR

Mark's input is specifically needed for the AVATAR project.

Regards,
