Hi,

Status update as of 2024/03/14 is the following:

1. OGC Features

PR: https://github.com/de-jena/ogc-features/pull/1

Having added pagination and fixed issues mentioned earlier, plus 2 other which I noticed, this PR is now marked as ready for review.

Please be aware, that, because of https://github.com/geckoprojects-org/org.gecko.emf.persistence/issues/25, there are PRs opened in projects this project depends on, i.e.:

- https://github.com/geckoprojects-org/org.gecko.emf.persistence/pull/26

- https://github.com/geckoprojects-org/org.gecko.emf/pull/50 (transitively via 'org.gecko.emf.persistence')

Until those are merged and released to Maven Central, I temporarily included latest version of 'org.gecko.emf.mongo.component' in this project.

2. Gecko EMF Persistence for OSGi

PR: https://github.com/geckoprojects-org/org.gecko.emf.persistence/pull/26

3. Gecko EMF

PR: https://github.com/geckoprojects-org/org.gecko.emf/pull/50

4. Stadt Jena

I sent you the files you asked for at the end of monday via Slack.

5. Next steps

Please let me know whether you have something urgent so I can prioritize it as next steps, otherwise I will be working on other stuff from backlog.

Regards,
