

Subject: Ongoing projects - status update as of 2024/04/03 / requests for clarification

From: Michal Siemaszko <mhs@into.software>

Date: 4/3/24, 15:30

To: Jürgen Albert <j.albert@data-in-motion.biz>, Mark Hoffmann <m.hoffmann@data-in-motion.biz>

Status as of 2024/04/03 is the following:

1. PlayerTour

In addition to items outlined in weekly summary sent on 2024/03/27, here's some additional items taken care of:

- <https://github.com/AmateurPlayerTour/backend/issues/42>
- <https://github.com/AmateurPlayerTour/backend/pull/41>
- <https://github.com/AmateurPlayerTour/backend/issues/40>
- <https://github.com/AmateurPlayerTour/backend/issues/39>
- <https://github.com/AmateurPlayerTour/backend/issues/38>
- <https://github.com/AmateurPlayerTour/backend/issues/35>

Most importantly, please see <https://github.com/AmateurPlayerTour/backend/issues/42>, as it contains details of profiling.

Since profiling results point at libraries / frameworks used by PlayerTour code, solving those issues (especially over 26 exceptions per second thrown) would provide value not only for the PlayerTour project, but for all projects using this same tech stack.

I shared snapshots taken during profiling and shared them - please see <https://github.com/AmateurPlayerTour/backend/issues/42> for details.

Please let me know if there is anything you'd like me to take care of regarding those findings, aside from tweaks I applied (outlined in <https://github.com/AmateurPlayerTour/backend/issues/42>).

2. SmartCity

I will switch to items you assigned to me, billed under SmartCity project, as per your

request.

Since I have no questions, know what to focus on, and conveyed in writing all that needs to be passed on, I would like to ask that we skip today's meeting at 4 PM.

Regards,
