Hi,

A bit belated, as I normally send status updates in middle of the week, but I started working on the new project you assigned to me and wanted to finalize with technical analysis / initial solution architecture first.

Therefore, status update as of 2024/05/19 is as per attached summary document, which provides updates on the following projects:

- DTO to EMF converters
- Gecko EMF Persistence for OSGi
- OGC Features
- EMF model driven development of Jakarta RESTful OSGi applications

Please review and provide your input.

Regards,
