Hi,

Status update as of 29.10.2023 is the following: Modifications and new features you requested for EMF exporters are committed (see commits from 3 days ago and few hours ago).

Please review info shared via <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/23#issuecomment-1784121205> and <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/23#issuecomment-1781593148>; these contain also some items where I need your input on - please refer to <https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/23#issuecomment-1784121205> for more details.

I also would like to finish this by end of this month, but this depends on how soon I receive your feedback / clarifications.

Once EMF exporters are approved by you, I will integrate this into MDO project, as discussed during our call on 23.10.2023.

In addition, please clarify regarding next steps, i.e.:

- should I switch back to work on custom Java - R implementation ?
- did you and Mark decide regarding Gecko EMF Persistence for OSGi ?

Regards,
