Hi,

Status update as of 06.11.2023 is the following:

1. I resolved conflicts and PR #23 (<https://github.com/geckoprojects-org/org.gecko.emf.utils/pull/23>) was merged to `jakarta` branch
2. I was asked to also do a release of this latest version of `org.gecko.emf.utils`, however, I need to clarify first **(a)** how release is made currently, **(b)** why is it not fully automated for all bundles and **(c)** whether I should take care of automating it; as it stands currently:
 - some of the directives / variables set in `cnf/build.bnd` imply `org.gecko.emf.utils` is released to Maven Central only, however
 - I found `org.gecko.emf.utils` in Nexus <https://devel.data-in-motion.biz/nexus/#browse/browse:maven-central:org%2Fgeckoprojects%2Femf>, in addition
 - `Jenkinsfile`, updated by you Juergen about 9 weeks ago, has a separate stage `Props` for releasing only one of the bundles, namely `org.gecko.emf.bson`, and
 - none of the GitHub workflows `.github/workflows/` have any release step

Regards,
