Hi Juergen,

In my weekly summary sent last week I asked to please let me know whether you have something urgent so I can prioritize it as next steps, otherwise I will be working on other stuff from backlog.

Since I have not heard back from you, here's a list of next items I will be focusing on, all related to PlayerTour project, unless there's something else more urgent:

 - "Swagger / OpenAPI GeoJSON support in REST API endpoints utilizing generated EMF model code #28" - implementing solutions specific to the PlayerTour project and integrate into PlayerTour project
    https://github.com/AmateurPlayerTour/backend/pull/28

 - Keycloak Vaadin GUI integration - persist changes to Keycloak realms once staging / prod servers are fixed
    https://github.com/AmateurPlayerTour/backend/issues/26#issuecomment-1820056756

 - backend issues I noticed in reivew of work Marcus did in https://github.com/AmateurPlayerTour/frontend/pull/11#issuecomment-1817169295

 - backlog (frontend/backend) - close / move from GitLab, share what I have in my notes / etc.

Regards,

```

> Hi,

Status update as of 2024/03/14 is the following:

1. OGC Features

PR: https://github.com/de-jena/ogc-features/pull/1

Having added pagination and fixed issues mentioned earlier, plus 2 other which I noticed, this PR is now marked as ready for review.

Please be aware, that, because of https://github.com/geckoprojects-org/org.gecko.emf.persistence/issues/25, there are PRs opened in projects this project depends on, i.e.:

- https://github.com/geckoprojects-org/org.gecko.emf.persistence/pull/26

- https://github.com/geckoprojects-org/org.gecko.emf/pull/50 (transitively via 'org.gecko.emf.persistence')

Until those are merged and released to Maven Central, I temporarily included latest version of 'org.gecko.emf.mongo.component' in this project.

2. Gecko EMF Persistence for OSGi

PR: https://github.com/geckoprojects-org/org.gecko.emf.persistence/pull/26

3. Gecko EMF

PR: https://github.com/geckoprojects-org/org.gecko.emf/pull/50

4. Stadt Jena

I sent you the files you asked for at the end of monday via Slack.

5. Next steps

Please let me know whether you have something urgent so I can prioritize it as next steps, otherwise I will be working on other stuff from backlog.

Regards,
