Re: Levant Gorgen <levant@kentyou.com>

Hi Levant,

Tim replied to me and I just replied back - please see earlier message (sent few minutes ago).

I have all info needed at this stage, so it looks like we're ready to start.

Please let me know if I should prepare contract then. Provided we finalize with these formalities by tomorrow, I could start tomorrow (Tuesday, September 10th) or the day after (11.09).

Regards,

Hi Levant,

Just to quickly summarize our call few minutes ago:

- you confirmed you received my email from September 5th (see below)

- you said Tim is off this week and will be able to reply on Monday;

- you mentioned deadline coincides with OSSG summit at OCCX 2024, Mainz, Germany, which takes place on October 22nd, 2024;

If you have any other questions regarding formalities, please let me know so we're ready to start ASAP, as you mentioned we need.

Kindly please confirm you received this message - unfortunately, there is a problem with electronic communication, hence my call to confirm..

Regards,

On 9/5/24 01:43, Michael H. Sarmacko wrote:

Hi Levant,

To answer your question:

- the contract with Data In Motion I shared with you after our call few weeks ago (see my email from August 8th, 2024, also re-attaching to this email) specified daily rate of 360 EUR which is 45 EUR / hour - however, that was 1 year (long term) contract, executed over a year ago (June 2023)

- for one-off short term engagements (less than 3 months), but longer than few hours work (as implementing this will take more than a day most definitely), I can offer your 450 EUR / day daily rate - that is my regular hourly rate of 75 EUR multiplied by 8 hours minus 25% discount, i.e. **56.25 EUR / hour**;

- I can offer you further discount for longer term (i.e. 3 months or longer) contracts;

Please let me know if should prepare such short-term material contract and I will take care of what is needed to start early next week.

Also, I have not heard from Tim yet (as of 1:30 AM 5.09.2024) - hopefully he can respond today this way I have all info needed, at least for this initial phase (scope, deadline).

Regards,

Hi Michael,

Thanks for your quick reply.

I've will respond to you for the technical questions and the timeline.

Could you please provide me the hourly rate you would foresee for this short term mission ?

Thanks
Levant

Objet: Re: Java Developer and Platform Engineer (Re: Kentyou are hiring)

Hi

Thank you very much for reaching out. I understood it was August / holiday time, hence the silence after our call several weeks ago. I'm glad I can be of help!

Five questions to start with:

a) Is it "100 Feature Specification" (page 71 of <https://www.7day4data.com/wordpress/wp-content/uploads/2024/08/100-Feature-Launcher-Service-Specification.pdf>) or "100 Feature Launcher Service Specification" (page 61 of <https://www.7day4data.com/wordpress/wp-content/uploads/2024/08/100-Feature-Launcher-Service-Specification.pdf>) or both ? You mention "OSSG Feature Specification", then refer to "OSSG Feature Launcher Service Specification", so it is not clear.

b) If this was a long-term contract, billing would be monthly, per day, per, since we do not have a long-term contract yet, billing would be weekly, per hourly rate, which is higher than in long-term contract - either way, it's fine & reasonable, also, that implies a 6000 term of contract - is that something you are comfortable with and should I prepare such short-term term & material contract then ?

c) You mentioned you want to start ASAP but how soon you need this done ? I need to know as I have other things going on and could devote 20-22 hours per week, depending on how soon this needs to be done.

I could start early next week, provided we can get formalities taken care of until then.

Kind regards,

Michael H. Sarmacko

Hi Michael,

Thanks for your email and sorry for my late reply.

We have been discussing internally and we think that we may have an immediate opportunity of collaboration with you under a concrete implementation task.

It is about the implementation of the OSSG Feature Specification

- The latest updates and comments for the Feature Launcher specification can be found at <https://www.7day4data.com/wordpress/wp-content/uploads/2024/08/100-Feature-Launcher-Service-Specification.pdf>
- The actual API classes are available at <https://github.com/mhsarmacko/100-Feature-Launcher-Service-Specification>

• A PDF copy of the specification doc can be found at <https://www.7day4data.com/wordpress/wp-content/uploads/2024/08/100-Feature-Launcher-Service-Specification.pdf>

Would this be something you would be interested in helping us out?

We can discuss about details if you are interested.

All the best,
Levant.

Hello,

Thank you for the call yesterday.

It can be of help, or if you have any additional questions - perhaps on more problem-solving level (please see <https://github.com/mhsarmacko/oss-g>) for a list of such examples, i.e. problems which had to be solved) - please do not hesitate to get in touch.

Regards,

On 8/9/24 10:56, Timothy Ward wrote:

Hi Michael,

I'm glad that time works for you - You send a Teams meeting invite for Tuesday at 15:30. We don't normally use a live coding session for candidates with a GitHub portfolio demonstrating that they can code, so it will be a more general/theoretical interview. There's no need to prepare a development environment.

I look forward to speaking with you on Tuesday.

All the best,
Tim

On 8 Aug 2024, at 23:37, Michael H. Sarmacko <msarmacko@7day4data.com> wrote:

Hi Tim,

Thank you - I appreciate your interest in working together.

Tuesday (13.08) at 15:30 CET would work for me.

Should I prepare any specific environment for that meeting - e.g. you require a live coding session ? I am fresh off working for 3 years on a very similar position (<https://kentyou.com/2017/10/20/oss-g-developer/>), as you may know, but there are a multitude of technologies this touches upon. So, if possible, please let me know if any up-front environment set up is required / areas you're most interested in.

Hi Michael,

I'm glad to hear that your first interview went well - the next interview will be more technical, and we should be able to fit it in next week.

Would you be free to meet (virtually) on Tuesday between 1030 and 1200, or 1530 to 1630 ? If Wednesday would be better then we could also make 1030-1200 then as well.

All the best,
Tim Ward

Hello,

This is in regards to "Java Developer and Platform Engineer" position you advertised on <https://kentyou.com/2024/08/02/ken-developer/>

Attached please find my CV, in both chronological and functional form; also please see <https://www.2topbyte.com/about> for sample of projects I've worked on.

I have extensive experience with GSG, in addition to matching most of the requirements listed for this position (<https://kentyou.com/2024/08/02/ken-developer/>) for details, please see attached CVs.

If I can be of help, or if you have any questions, please do not hesitate to get in touch.

Hi ...

Are you (or someone you know) looking for a new role? Kentyou are currently looking for experienced data developers, full stack engineers and data Analysts.

Kentyou is a startup company aiming to turn little data more sustainable, innovative, and little-to-nothing environments to live and work in. We do this by enabling single access to one and existing IoT data sources, as well as through improved data processing, visualization and machine learning tools. We use DDD technology in our products and in our open source contributions, as well as you've discovered them please do get in touch via our website at <https://kentyou.com/2025/01/02/ken-developer/> - we'd love to hear from you!

Best wishes,

Tim Ward

CEO Kentyou
